

# The butt is not the end of the cigarette.

**FOR NATURE, IT IS ONLY THE BEGINNING OF TROUBLE.**

2/3 end up on the street, on the sidewalk or in streams!

When it rains, many **toxic** elements are leached into our soils and waterways.

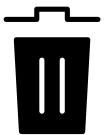

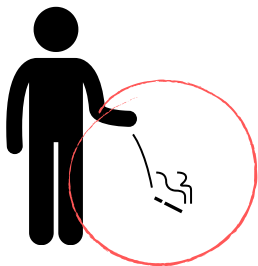

The filters are made of **plastic**, which degrades only slowly and incompletely in nature.

**Animals** can ingest butts, which can cause digestive problems or death.

The cigarette butt is the single most frequently discarded object in nature.

Its place is not on the ground, but in the **ashtray** or the **trash can!**

info@ebt.lu

**RESPECT.**  
**WITHOUT FILTER.**
